About Me

I develop and integrate APIs with core banking systems, handling data exchange formats like JSON, XML, OFS, ISO messages, MT, and Pain messages. Skilled in Python, JAVA and ESB Fiorano, I enjoy solving complex system challenges and building seamless, high-performing solutions.

Education

Bachelor of Management Information Systems

SETEC Institute
2020 - 2024

Certifications and Training

Aditi Academy
2024 - 2025
iOS Development (6 months)
API Development (3 months)

Skills

- Python, Java
- Security & Cryptography
- Databases
- Office Tools
- Internet & Email

Language

- English
- Khmer

Experience

Developer (System Integration) | CANADIA — *2023 – Present*

Design and integrate core banking, mobile, and web applications while ensuring secure, seamless data exchange.

- API Development & Integration: Led API integration projects connecting core banking systems with mobile, web, and third-party apps; designed and optimized integration flows using Fiorano ESB.
- Tech Stack & Data Handling: Oversaw development with Python and Java; managed data exchange using JSON, XML, Pain messages, SWIFT messages, and MT messages.
- Data Security & Compliance: Implemented encryption standards (AES, RSA ...) and ensured compliance with banking security regulations.
- System Monitoring & Automation: Directed system monitoring, troubleshooting, and server management; automated routine tasks and used Telegram bot for real-time alerts to minimize downtime.
- Team Collaboration & Documentation: Guided developers and collaborated with analysts, project managers, and vendors; created API guides and data dictionaries for internal and external stakeholders.
- Risk Management & Process Improvement: Identified system risks, implemented mitigation strategies, and improved integration processes to enhance stability and efficiency.

Software Support | Bill24 — *2021 - 2023*

Bill24 provides e-Invoice, e-Payment solutions, and API integration services with Cambodia's local banks.

- API Integration: Integrated third-party APIs, updated documentation, and resolved issues for smooth system performance.
- Testing & UAT: Created and executed test plans for SIT, UAT, Pilot, and PROD phases, ensuring business requirements were met.
- Issue Resolution: Collaborated with developers to quickly fix system bugs and maintain stability.
- Database Management: Managed PostgreSQL and Oracle databases, performing queries, updates, and troubleshooting.
- Reporting: Generated monthly test reports and communicated findings to stakeholders for continuous improvement.

COVER LETTER

Address: Phnom Penh | Tel/Telegram: 095 323 346 | Email: phokeanghour12@gmail.com

Dear Hiring Manager,

I am excited to apply for your IT Program. As a Developer at Canadia Bank PLC, I design and integrate APIs connecting core banking systems with web and mobile platforms. I specialize in Java, Python, and ESB Fiorano, handling data exchange with JSON, XML/XSD, Pain, SWIFT, and MT messages, while ensuring secure systems using encryption methods like AES, RSA, and PGP, and maintaining compliance with banking security regulations.

Previously at Bill24, I supported API integrations and online payment systems for Cambodian banks, improving system reliability and collaboration with vendors. I hold a Bachelor's in Management Information Systems and have completed training in iOS and API development.
I am passionate about solving technical challenges and delivering seamless, high-performing systems, and I would welcome the opportunity to contribute to your team.

Thank you for your consideration.

Sincerely,
Pho Keanghour
