About Me

I develop and integrate APIs with core banking systems, working with data formats such as JSON, XML, OFS, ISO, MT, and Pain messages. I have experience with microservices and message driven architectures using tools like RabbitMQ, Redis, Jenkins, and Kubernetes. Skilled in Python, Java, and Fiorano ESB, I focus on solving complex system challenges and building seamless high-performing solutions.

Education

Bachelor of Management Information Systems
SETEC Institute
2020 - 2024

Certifications and Training
Aditi Academy
2024 - 2025
iOS Development (6 months)
API Development (3 months)

Technical Skills

Languages: Python, Java

Integration & Data: JSON, XML, OFS, ISO 20022 (SWIFT MT & Pain messages)

Databases: PostgreSQL, MySQL, Redis, H2

DevOps & Tools: Docker, Kubernetes, Jenkins, Git, AWS, Cloudflare

Messaging: RabbitMQ, Kafka

Security & Cryptography: AES, RSA, GPG, MD5

Tools: MS Office, Internet & Email

Language

- English
- Khmer
- Chinese

Experience and Responsibility

Developer (System Integration)|Canadia Bank ***2023 – Present***

Build APIs to integrate core banking, mobile and web systems for secure, seamless data flow.

- **API Development & Integration**: Led API integrations connecting core banking systems with mobile, web, and third-party apps; designed and optimized flows using Fiorano ESB and microservices.
- **Tech Stack & Data Handling**: Built solutions with Python and Java; handled data exchange using JSON, XML, ISO 20022 (SWIFT MT & Pain messages).
- **Security & Compliance**: Implemented AES/RSA encryption and ensured adherence to banking security standards.
- **Monitoring & Automation**: Managed system health, troubleshooting, and servers, automated routine tasks and built Telegram bots for real-time alerts.
- **Collaboration & Documentation:** Created clear README and developer guides for every API; prepared internal integration manuals and client-facing data dictionaries to ensure smooth implementation.
- **Risk & Optimization**: Identified system risks, applied mitigation strategies, and improved integration processes for stability and performance.

Software Support | Bill24 ***2021 - 2023***

Bill24 provides e-Invoice, e-Payment solutions, and API integration services with Cambodia's local banks.

- **API Integration**: Integrated third-party APIs, updated documentation, and resolved issues for smooth system performance.
- **Testing & SIT/UAT**: Created and executed test plans for SIT, UAT, Pilot, and PROD phases, ensuring business requirements were met.
- **Issue Resolution**: Collaborated with developers to quickly fix system bugs and maintain stability.
- **Database Management**: Managed PostgreSQL and Oracle databases, performing queries, updates, and troubleshooting.
- **Reporting**: Generated monthly test reports and communicated findings to stakeholders for continuous improvement.

COVER LETTER

Address: Phnom Penh | Tel/Telegram: 095 323 346 | Email: phokeanghour12@gmail.com

Dear Hiring Manager,

I am excited to apply for your IT Program. At Canadia Bank PLC, I lead and expose APIs for integration projects, connecting core banking systems with web, mobile, and partner or client applications. I design and optimize integration flows using Fiorano ESB and Python microservices, working with data formats like JSON, XML/XSD, ISO 20022 (Pain, SWIFT MT), and OFS, while ensuring security and compliance through AES, RSA, and PGP encryption.

Previously at Bill24, I supported API integrations and online payment systems for Cambodian banks, improving system reliability, automating workflows, and collaborating with vendors and stakeholders. I also created clear API documentation, internal integration guides, and client-facing data dictionaries to ensure smooth implementation.

I hold a Bachelor's in Management Information Systems and have completed training in iOS and API development. I am passionate about solving complex technical challenges and delivering high-performing systems, and I would welcome the opportunity to contribute to your team.

Thank you for your consideration.

Sincerely,
Pho Keanghour
